

FORD DURATEC 2.0 Litre 16 Valve Engine

Webcon UK are pleased to announce the launch of Three New Alpha Performance Kits for the **Ford Duratec 2.0 16 Valve Engine**.

These new kits have been developed with 'Raceline® Engineering' to bring you bolt on turn key performance kits for your Ford Duratec Engine.

- **K3190JR**

Designed for standard specification engines producing Approx. 190 BHP.

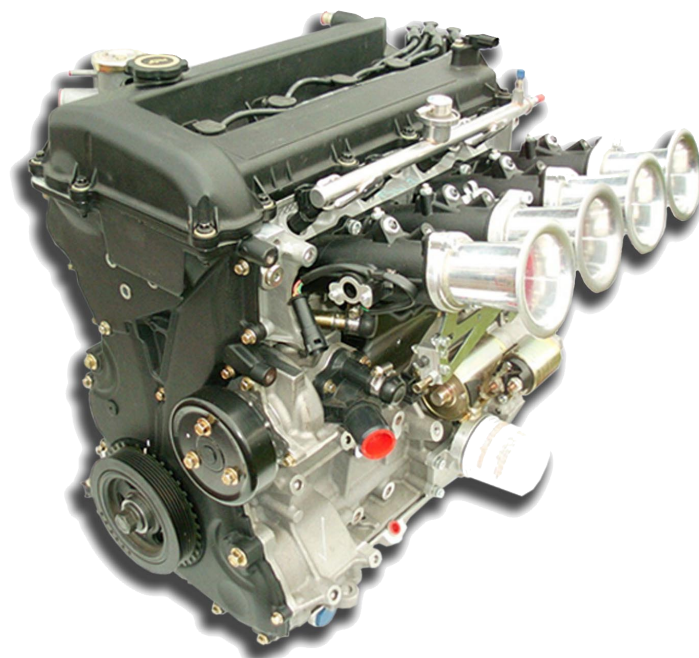

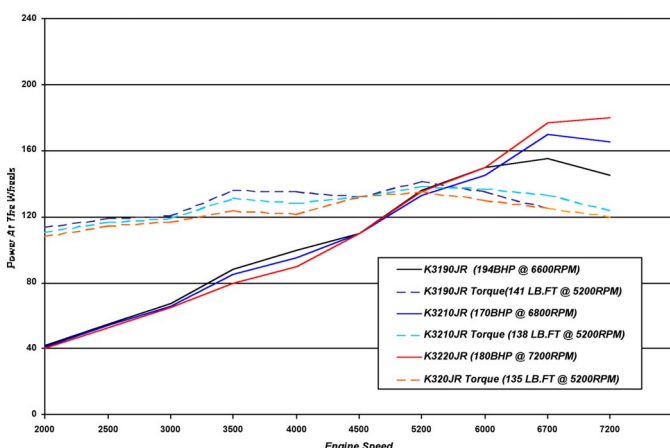

- **K3210JR**

Designed using Fast Road Cams and Valve Springs producing Approx. 210 BHP.

- **K3220JR**

Designed using High Performance Cams, Valve Springs and Modified Pistons to produce Approx. 225 BHP.

Each kit comes with all the components needed to complete the installation including comprehensive fitting instructions.

Alpha Performance Kit Contents:-
