

## Boost the power of your 1600cc K-Series Caterham with the latest Alpha Performance TURNKEY kit from Webcon.

Webcon have been providing OEM quality, performance engine management solutions for almost 20 years, and offer an unrivalled range of affordable, TURNKEY Engine management kits to suit most of the standard tune engines commonly used in Kit Car, Motorsport and Fast Road applications.

These kits are designed to bring the fitment of Engine Management systems within the scope of the enthusiastic DIY installer, and require no additional equipment or calibration skills.

This range has now been enhanced to include a kit for the Rover K Series engine in its most popular 1600 cc format, and used in conjunction with Caterham's Superlight non-CAT exhaust system, boosts peak Roadwheel horsepower by almost 20BHP.

Kits are supplied professionally calibrated for a standard specification engine. For other states of tune please contact us.

#### *Each kit includes:*

- ◆ Alpha Performance Engine Management System
- ◆ 2 x Alpha Throttle bodies incl Injectors/TPS
- ◆ 4 x Performance Air Filters
- ◆ Inlet Manifold & fitting kit
- ◆ Webcon Throttle linkage system
